

Clement Ho

SR. FULL STACK DEVELOPER · DEVOPS ENGINEER

12740 Royal Oaks. Ln, Farmers Branch, TX 75234

📞 (+1) 682-553-3989 | ✉️ klenein@gmail.com | 🌐 clementho00

“Engineer focused on defining and developing the best practices to meet quality standards and delivery deadlines.”

Education

University of Texas at Dallas

B.S. IN SOFTWARE ENGINEERING

Dallas, Texas USA

Sep. 2004 - Apr. 2009

Skills

DevOps

Docker, Kubernetes, IBM Cloud, Azure DevOps, Cloudant, Jenkins, Github Action, Mezmo, Coverity, Dynatrace, Artifactory, Quantum Metric, APEX AIOps

Back-end

Spring Boot, REST API, SQL

Front-end

Angular, Redux, HTML, CSS, RXJS, NGXS, NestJS

Programming

Java, Javascript, Typescript, Node.js, Kotlin, Groovy, YAML

Tools

Maven, Gradle, Sabre, Splunk, Postman, SoapUI, Microsoft Office

Languages

English, Mandarin, Japanese

Experience

Sr. Full Stack Developer

AMERICAN AIRLINES

Fort Worth, TX

Nov. 2021 - Present

– MODERNIZE AIRPORT KIOSKS –

- Modernized multiple scale of applications including airport kiosks and microservices which serve millions of customers around the globe
- Migrated the UI from end-of-life flash to a single page Angular application
- Implemented multiple analytics tools to get deep insight of customer usage and behavior
- Utilized Agile methodology and built automation to allow on-demand software updates and deployments

– LEGACY MONOLITH TO CLOUD –

- Migrated on-prem stateful application that was serving over 7000 airport kiosks worldwide to modern cloud infrastructure
- Designed Kubernetes setup and Jenkins/Github Action pipelines for deployment and provision of new cloud instances
- Provided flexibility with application updates and maintenance in addition to cost savings

– ENTERPRISE SERVICE MIGRATION –

- Designed and built multiple highly scalable and complex microservices to replace legacy monolithic applications to serve multiple product teams
- Built web portal to enable teams across the enterprise to manage middleware components
- Allowed individuals to create accounts, discover services and make on demand updates in lower environments and request for production deployments
- Utilized Sabre mainframe tool to create test data for accurate feature implementation and testing by replicating real-world scenarios

– MENTORSHIP AND TEAM TECHNICAL LEAD –

- Trained and mentored junior developers on best practices, coding standards, and domain knowledge via extreme pair-programming
- Led multiple projects to deliver high quality software by working closely with product owners and business teams
- Presented and demonstrated new features and applications to stakeholders and business teams

– DEVELOPMENT AUTOMATION –

- Created multiple automation pipelines in Jenkins and Github Actions to perform code quality checks, unit tests, integration tests, functional tests, artifact package creation, Slack bot notification, change request generation, approval review gate and deployment
- Implemented automated web certificate renewal and email notification for expiring certificates

Full Stack Developer

Fort Worth, TX

AMERICAN AIRLINES

Feb. 2020 - Nov. 2021

- Developed full-stack customer-facing applications
- Maintained, enhance and innovated applications to cut costs for company
- Improved user experience by implementing new features and fixing bugs
- Utilized best practices to ensure clean, working and error-free code
- Collaborated with team members in extreme pair-programming to learn as well as mentor each others

DevOps Engineer - Site Reliability Engineer

Fort Worth, TX

AMERICAN AIRLINES

Dec. 2018 - Feb. 2020

- Built CI/CD automation pipelines for multiple engineering teams to fully automate the deployment process and application's lifecycles
- Created Docker containers and built Docker images to deploy applications in Kubernetes
- Managed and maintained Kubernetes clusters in multiple environments
- Coached and mentored engineering teams on best practices for CI/CD, Docker, Kubernetes, and other DevOps tools
- Supported and configured analytics monitoring tools for application ranged from microservices to large-scale monolithic applications

Mobile QA Analyst

Fort Worth, TX

AMERICAN AIRLINES VIA NTELCOR LP

Aug. 2017 - Dec 2018

- Developed automation test suits for mobile applications using Android Espresso
- Utilized Sabre to create test data for Android and iOS mobile applications testings
- Performed User Acceptance Testing (UAT), Regression Testing, and Functional Testing for Android and iOS mobile application
- Adopted Agile Methodology to work closely with developers and product owners to ensure the quality of the applications

Software Development Engineer

Arlington, TX

GM FINANCIAL

May. 2015 - Aug 2017

- Analyzed business and technical requirements to develop optimal and effective testing solutions for both front-end and back-end applications
- Managed SDLC and defects tracking using ALM
- Designed and implemented automation test scripts with practices that are scalable and maintainable in an on-time and cost-effective manner
- Worked closely with various business, project and development teams from planning to execution phases while reporting performance metrics and driving solid solutions to improve the quality of the applications

QA Information Testing

Plano, TX

HEWLETT PACKARD

Jul. 2013 - May 2015

- Ensured the delivery of a high standard of work across multiple projected through the effective use of test automation tools
- Developed SQL queries to validate data integrity and data quality
- Performed comprehensive functional and regression testing on web-based applications

Certificates

- 2016 **Oracle Database 11g, SQL Fundamentals Certified**, Oracle
- 2015 **Perfecto Engineering in Manual Automation, Architecture and System Administration**, Perfecto
- 2012 **International Software Testing Qualified, Foundation Level**, ISTQB
